Art Unit: 1755

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

This claim teaches the alkali is ammonia containing carbonate ions. This composition is indefinite. Ammonia is a gas and it would not contain carbonate ions. The specification teaches an aqueous ammonia containing carbonate ions. It is suggested to amend the claim to include "aqueous" before ammonia.

Claims 1-4 and 7-9 are allowable over the cited art of record.

Claim 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claim 6 objected to as being dependent upon a rejected base claim, but would be allowable if claim 5 is rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

There is no teaching or suggestion in the cited art of record of cobalt doped iron oxide particles having the claimed particle size ranges, the aspect ratio range, the pH, the impurity content and cobalt amount.
